

Software Project Synopsis / Proposal

The project synopsis is required to be precise and should cover description of all the modules.

*Project synopsis is a proposal presented to the authority to express three P's : **Purpose, Procedure and Plan.***

Types of Projects

This section covers 12 major types of projects a student can undertake :

1. **Stand Alone, Desktop Application**
2. **Inventory System**
3. **CRM**
4. **ERP**
5. **Network Application**
6. **Website**
7. **Web Application**
8. **Web Service**
9. **Cloud base Application**
10. **Utility based application**
11. **Mobile Phone Application**
12. **Games**
13. **Research**

1. Title

- **The TITLE of the project should be self-explanatory**
- **It should resemble your project.**
- **It should reflect the scope of the project.**
- **Times New Roman / Arial – Bold – size: 14**

Some Examples:

- ⇒ **Customer database management system**
- ⇒ **Medical shop inventory management system**
- ⇒ **Garment factory inventory, stock, supplier and customer database management system**
- ⇒ **Information management website for _____**
- ⇒ **Content Management Website for _____**
- ⇒ **e-commerce / e-learning interactive website for _____**

⇒ *Strategy / Action / Puzzles / Board Game “Name of Game”*

⇒ *Mobile based application for expense management.*

2. Introduction

⇒ *Will provide brief history of the subject chosen.*

⇒ *It must identify the importance of study, its relevance and applicability of results*

⇒ *It has to state clearly the intent of the project.*

3. Objective

⇒ *Precise*

⇒ *Pointwise*

⇒ *Simple sentences stating the goal*

4. Stake Holders

Stakeholders are the members of the software developer teams who intend to have successful completion and implementation of the project.

Types of Stake holders

⇒ *Client*

⇒ *Users. (role / designation: what actions they will perform on your system)*

⇒ *Technical User*

5. Expected Modules and Sub-modules

Write the list of expected modules and sub-modules which will be implemented in the projects.

Minor changes in the modules are allowed during development of software but should not change the statement of purpose.

HINT: Modules will later convert to classes and methods in your project.

Example:

1) *Login module: this module will be designed to handle all the login related activities.*

Sub-modules of login module:

i) *Register : to register new user*

ii) *Sign-in: to allow registered users to sign in using login id and password.*

iii) *Recover password : to allow user to recover the password.*

6. Hardware and Software Requirements

Here you need to explicitly and specifically mention the hardware and software requirement to implement your project.

Hardware / Requirements:

- *Min. Processor*
- *Hard-drive / Secondary storage size*
- *Primary / RAM size.*
- *System Architecture : 32 bit / 64 bit*

Software Requirements:

- *Operating Systems : Windows 7 and above*
- *Programming language with version*
- *Runtime environment with version*
- *Database with version*
- *Framework*
- *Browser*

Network Requirement

- *DNS*
- *Hosting server*
- *Network Protocol*

7. Similar Software Study / background Study

- *Title (BookMyShow.com)*
- *Type (web service: online ticket booking system)*
- *hardware and software requirements*
- *Modules*
- *Salient features*
- *Limitations*
- *Remark.*
